

RESILIENCE IN CONTEMPORARY NEED FOR COMMUNICATION & NETWORKING

OWHC Regional Conference
North-West European Region
13 -14 Nov. 2014, Quedlinburg, Germany

Gediminas Rutkauskas, Vilnius Old Town Renewal Agency

Dedicated to the 25th anniversary of a cultural, social and political phenomenon of the Baltic Rout

Intangible historic cultural capacities remains concentrated and possessed in most of the WH towns

Global challenges and given current historic situation actualize general need to focus on the historic knowledge and experiences of the WH towns – their intangible values, not the physical ones

Today it's needed to more
learn, communicate,
understand and get
integrated with each
other than remain focused
on own methodic and
technologic matters of
historic properties
preservation

Evolution in heritage preservation from object and complex to integrated management of urban sites and cultural landscapes

Evolution in heritage preservation from physical treatment to communication, comparative analysis, exchange and corporate action

Resiliency potentially capable to prevent or confront the crisis could be augmented by rediscovering and recognizing common positive driving factors that caused historic success of integral urban progress of the WH towns

The Baltic WH Rout project started in 2012 initiates a consolidated and corporate action in WH promotion and tourism development

The Baltic WH Rout project started in 2012 is planned to be continued in 2014 – 2020

One of an innovative and creative means – the WH Research, Information and Communication Centre intended to be found in Vilnius

The WH Research, Information and Communication Centre: integral collection of information, permanent communication with local and global city researches and residents

Thematic historic research and comparative analysis

WH Research, Information and Communication Centre: monitoring and research of physical state of historic properties

WH Research, Information and Communication Centre: search and build links with WH towns through finding common needs, interests and historic cultural denominators

Examples: A.G. Casparini organ project, www.casparini.it

Examples: success stories from the regional partners

Examples: development of new historic narratives aimed to properly meet and respond to contemporary conflicts and ideological historic facts' manipulations

Development of WH Research, Information and Communication Centers could be an effective innovative instrument consolidating and strengthening regional cooperation of WH towns

Thanks for your kind attention
