RESTORATION OF FOUNTAINS IN SAFRANBOLU

› There are a total of 104 registered fountains in Safranbolu.
› 90 of them are the property of Safranbolu Municipality.
› 14 of them are privately owned fountains.
› We began the restorations in 2013.
› Fountains were restored within the projects approved by Cultural Heritage Protection Board in 2014. The restorations were made loyal to the original. For a total of about $185,000 has been spent on the restoration of 23 fountains.
› Till 2019, we aim to complete the restoration of all remaining fountains.

WITH THIS PROJECT... IN FACT...

› We are trying to protect our cultural heritage of ancestors in the best way.
› We are trying to transfer our cultural heritage to future generations.
› In fact, we draw attention to the diminishing water resources as a result of global warming.
› We are aware of in the future water will be more valuable than it is today for humanity.
› Because we know it very well, WATER IS LIFE.

Fatih ÜRKMEZER
Mayor of Safranbolu
