INVITATION

Dear all,

The OWHC Regional Secretariat for Northwest Europe and North America together with the OWHC Secretary General invites its active member cities to this interactive workshop in Visby/Sweden.

On the first day, we will address the topic of Heritage Futures in a workshop format which will be moderated by Prof. Cornelius Holtorf, UNESCO Chair Holder at Linnaeus University. We will explore the challenges of active peace work in the spirit of UNESCO in times of constant threat. Our aim is to provide inspiration and new perspectives for site managers and heritage professionals in our OWHC cities! A special focus will also be granted on the challenges in our host city Visby.

On the second day of the meeting, the OWHC invites the member cities for a New Urban Project (NUP) reflection. We will take the time to explain where we are with the elaboration process of the NUP-Program, which strategical and political orientations will have been validated. The Visby workshop will therefore be the opportunity to conduct a perception test to measure the relevance of the different components of the NUP's operational structure and to test with cities whether it meets their expectations and needs, as a program that targets the habitability of historical centers.

WELCOME TO VISBY!

Visby on the Island of Gotland is a pearl in the middle of the Baltic Sea. A former Viking site, Visby was the main centre of the Hanseatic League in the Baltic from the 12th to the 14th century. Its 13th-century ramparts and more than 200 warehouses and wealthy merchants' dwellings from the same period make it the best-preserved fortified commercial city in northern Europe.

The walled town is still inhabited and surrounded by the modern city where much of the everyday life takes part. We will explore both sides of today's Visby and discuss heritage futures in our World Heritage cities.

A warm welcome to Gotland in April!
